## COSMETIC CLINIC COOLANGATTA

The Cosmetic Clinic Coolangatta is one of the most established aesthetic clinics on the Gold Coast. Owned and operated by Dr Sanjay Mohindra, a qualified medical practitioner with advanced training in all facial rejuvenation procedures

Dr Mohindra has been working in Australia since 1989 and has over 35 years of extensive experience in different cosmetic procedures. He has lived on the Gold Coast practicing medicine and providing cosmetic procedures since 1996. His quality of work & unbeatable results have earned him a highly reputable name in the cosmetic field resulting in a large client following.

Dr Mohindra's team of dedicated and highly experienced & qualified dermal therapists who ensure that all clients are provided with the best possible care, results oriented with minimal downtime under his supervision.

Some of the medical aesthetic procedures in our clinic may be covered by Medicare.

# MEDICAL GRADE TREATMENTS

## Injectables

**Antiwrinkle** injections is the innovative way of reducing the appearance of visible wrinkles & the prevention of future wrinkles. We stock all premium antiwrinkle products available on the Australian market and all of our injecting procedures are administered by our doctor.

**Dermal fillers** are designed to add volume, create structure & symmetry in the face leaving a more natural yet youthful appearance. Results are immediately visible and generally involve minimal downtime and discomfort. Our clinic uses the worlds best products with uncompromised longevity.

## Dermal Filler

## Nose Remodelling

## Lip Filler - 1ml

All muscle relaxants at Cosmetic Clinic Coolangatta are FDA and TGA approved and administered by Dr. Sanjay Mohindra M.B.B.S., M.D

## **Veins & Vessels**

From tiny spider veins to deep blue reticular veins, our medical grade vascular laser can treat vessels & veins on all skin types quickly, safely & effectively. Pulses of light energy are delivered to vein causing the blood to coagulate eventually destroying the unwanted vessels which is later absorbed by your body.

**Telangiectasia  
After 1 Treatment**

**Leg Veins  
After 1 Treatment**

## **Venous Lake/Angiomas**

Benign vascular lesions that may arise anywhere on the body though most are diagnosed on the lower lip, earlobe or elsewhere on the face, neck, or upper trunk. Both lesions are completely harmless & easily treated with a specialized vascular laser.

**Cherry Angioma  
After 1 Treatment**

**Venous Lake  
After 1 Treatment**

### **Redness/Rosacea**

Redness occurs when tiny vessels in the skin dilate leaving a permanent flushed appearance, most commonly found on the face, neck and décolletage. Our laser treatments are non-invasive that reduce skin redness and rosacea, reduces pore size, smooths wrinkles and improves skin texture, tone and the appearance of scars to promote a vibrant, healthy looking complexion and rejuvenated skin. The leading laser technology allows minimal treatments, no downtime with effective, long lasting results.

**After 1 Treatment**

### **Nail Fungus**

Our medical grade 4 laser is one of the main lasers approved to safely & effectively treat onychomycosis (toenail fungus). By targeting the fungus directly & getting to the source of the problem immediately. A quick, easy, safe and effective procedure with a success rate of over 88%.

**After 3 Treatments**

### **Skin Tags/ Warts/Skin Cancers**

Benign flesh and hyperpigmented skin lesions can easily be treated & removed with minimal downtime or discomfort. Skin tags & warts generally require one or two treatments grade 4 laser is the most effective & quickest. Certain skin cancers can also be treated effectively.

**7 Weeks**

### **Pigmentation**

The most advanced laser technology to improve the appearance of unwanted pigmentation such as freckles, sunspots, age spots, melasma, stain & birth marks. Our American laser has the ability to treat all skin types & all areas of the body with no down time effectively removing the pigmentation.

**Melasma  
After 2 Treatments**

**Hyperpigmentation  
After 1 Treatment**

### **Acne/Scarring**

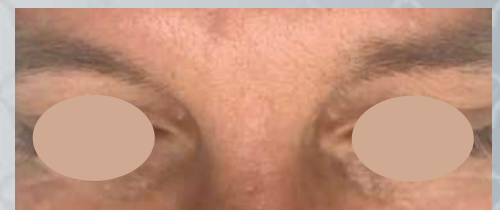

Acne presents with sore, inflamed pustules & papules, comedones and scarring of the dermal tissue. Our grade 4 laser treatments achieve remarkable results.

**After 2 Treatments**

**After 2 Treatments**

### **Tattoo Removal**

Using the revolutionary Enlighten III laser system to reduce the appearance of unwanted tattoos. A non-thermal, photomechanical laser is used to shatter pigments in the skin without damaging the surrounding tissue with no downtime or blistering. Enlighten III can treat all tattoo inks (red, green, purple & black), all tattoo ages & all skin types with minimal treatments.

**After 1 Treatment**

### **Laser Skin Resurfacing**

Non-ablative fractional laser that stimulates deep collagen regeneration over a sequence of treatments resulting in younger, healthier, glowing skin. A comfortable quick treatment with remarkable results in overall skin appearance & texture.

**After 1 Treatment**

**After 1 Treatment**

### **Skin Tightening**

Ultraformer III is a medical grade device that uses high intensity, high frequency ultrasound energy to instantly contract and coagulate collagen fibres promoting long term collagen growth to slow down the visible signs of aging.

**After 1 Treatment**

### **Fat Freezing**

Cooltech is the most advanced cryolipolysis system in the world today! Cryolipolysis is a medical grade treatment commonly known as fat freezing which utilises cryotherapy to destroy stubborn fat cells. This non-invasive procedure selectively targets & eliminates fat cells permanently by freezing them without damaging any of the surrounding tissue.

**After 1 Treatment**

All images are our clinical results. Please refer to our website for more results.

### **DNT (Skin Needling)**

This treatment creates minor trauma on the skin through micro needling, stimulating healing response beginning the natural repair process which accelerates the skins regeneration of collagen & elastin improving skin texture, clarity, wrinkles & scarring.

### **Microdermabrasion**

Microdermabrasion is a non-invasive exfoliation treatment used to retexturize, oxygenate & detoxify the skin improving the skins overall appearance and health.

### **Omnilux (LED Light Therapy)**

LED light therapy helps with anti-aging, wrinkle reduction and skin rejuvenation. Stimulates collagen production, accelerates wound healing, and kills aggressive acne bacteria.

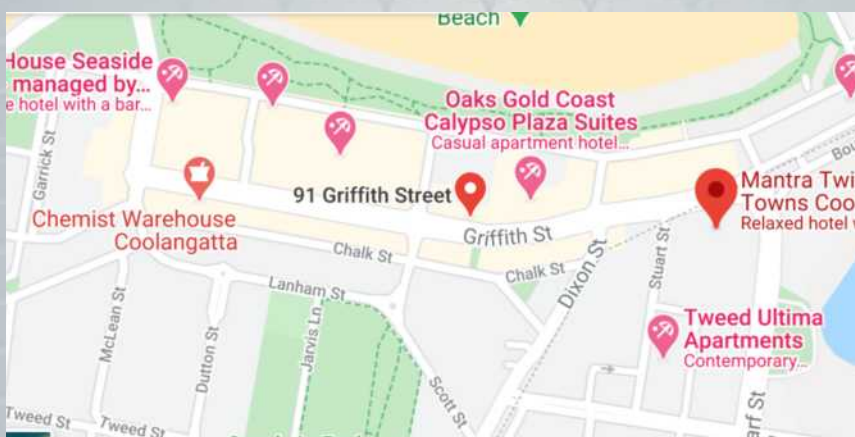

### **Medical Grade Chemical Peels**

A skin-resurfacing procedure recommended to treat fine lines/wrinkles, discoloration and can be performed in combination with other cosmetic procedures. Each type of peel use a different chemical solution to target your skin concern depending on your desired results.

### **Laser Hair Removal**

Selective small areas can be treated with effective hair reduction & minimal treatments.
