1 Treatment MP & Normal Mode

When do you feel the first signs of aging? It must be when there are wrinkles on the face. The standard that determines whether you are old or not is not age, but wrinkles.

Ultraformer MPT treatment fights sagging, wrinkles and all signs of aging. Considered to be the latest HIFU technology it prolongs beauty and youth.

FAQ

Am I a Candidate for Ultraformer MPT treatment?

Anyone concerned about sagging skin, fine lines, wrinkles, hyperpigmentation and problematic body areas are ideal candidates.

When can I see the results?

You can see the results immediately after the treatment. As the collagen regeneration process continues your skin will continue to improve for up to 6 months after the treatment.

How long do the results last?

With good aftercare the benefits of the treatment can last for about 1 year.

How painful is the procedure?

Some patients may experience slight redness and swelling on the treated areas.

Facial lifting & Skin tightening

Body Contouring
